Final Report Grading Rubric

Category			Remark	s/Marks							
Category	Poor	Mediocre	Good	Excellent	Outstanding						
Purpose, scope & objectives	1	2	3	4	5						
objectives	Project are briefly explained with the purpose of development, scope and objectives to be achieved.										
Constraints	1	2	3	4	5						
	Project clearly defined the limitation after development and constraints during the development process.										
Project Plan	1	2	3	4	5						
	Provid	le the project plan using Ms	Project application	on and shown detailed the	process of development.						
Roles &	1	2	3	4	5						
Responsibilities	Describe the organizational structure of the project team and provide group member's formal picture and their responsibilities with job designation.										
	1	2	3	4 5							
ERD	Place ERD in this section (put in appendix) and ensure it uses correction notation whether Crow's Foot or Chen, has relationships and cardinality. ERD should be matched with physical database.										
	1	2	3	4	5						
Data Dictionary	Please provide	e a list that contains name or		s and data type. All the comal database.	ponents must be exactly similar						
	1	2	3	4	5						
DFD	Place DFDs of the proposed information system here. Provide descriptions of the proposed information system according to provided diagram. Descriptions must be cleared to ensure audience able to understand what this document tries to deliver.										
Documentation &	1	2	3	4	5						
Format	Follow the documentation format with an appropriate arrangement and fulfilled requirements.

1. Introduction

1.1 Purpose

The purpose of the final report was made to show the lecturer how our system done in the terms of period time form earlier semester until the presentation day on 17/07/2023. Final report is summarization for all system progression within the time period was given.

1.2 References

- SDP version 1.2
- SRS version 1.2
- SDD version 2.1

2. Project Overview

2.1 Project purpose, scope and objectives

Project Purpose

• This system is for customers that are interested in buying coffee in our Coffee For Go! shop in an easier and efficient way. This system will also help administrator to manage details of customers while staff update the customer payment details.

Project Objective

- To analyze all the problems that occurs.
- To design a computerized database and system.
- To develop Coffee For Go! System.

Project Scope

- This system is developed for customers that want to purchase according to the menu given.
- Coffee For Go! system's top-level design and technological choices will be described in this study.

2.2 Assumptions and constraints

- System can only be managed by administrator.
- Customers have to register and login in order to use the system.
- Administrators are required to login to ensure the safeness of data.
- Admin passwords are not encrypted.
- Payments can only be updated by staff.

3.3 Roles and Responsibilities

Name: Muhammad Izzuddin bin Mohd Fathi

Student ID: 2021893118 NRIC: 030609-10-0077

Contact Number: 016-926379
Email: izzuddinfathi0@gmail.com

Role: System Programmer

Responsibilities: Leading the team, planning the project and assigning tasks to the members, keeping track of the project's progress and setting deadlines for tasks while

providing additional support.

Name: Eiman Damien bin Rohmat

Student ID: 2021466508 NRIC: 030916-10-0261

Contact Number: 018-2906167

Email: 2021466508@student.uitm.edu.my

Role: Project Manager

Responsibilities: Enhancing the system and making sure the system is running properly

while doing back-end work.

Name: Wan Muhammad Nagib bin Wan Mohd Nazri

Student ID: 2021453086 NRIC: 030711-06-0307

Contact Number: 013-4658283

Email: 2021453086@student.uitm.edu.my

Role: Database Programmer

Responsibilities: Create the database for the system while doing back-end work.

5. Conclusion and Recommendation

5.1 Conclusion

Coffee For Go! system will make it easier for customers to order coffee either for delivery or pickup. This system had achieved the objective which is to improve user experience. Even though it took quite some effort, we managed to handle and improve it and we also hope to do more of these kind of projects in the future.

5.2 Recommendation

It is recommended to set your browser to 100% zoom level to have the best view while using it. The organization should also take measurements in upgrading the system every 5 years in order to improve customer experience in ordering coffees.
